Response to Arguments

Applicant's arguments filed 11/12/2008 have been fully considered but they are not

persuasive.

The Applicant argues that the when mode is set in first operating mode only

authenticated software and protected applications have access to protected area. And

also the Applicant argues that restricted-mode is not used to prevent access into area.

Morgan discloses the access to data in two versions. The first is full-access mode

whereby the user has access to data using a key that is used to decrypt the data see

Col 6 Ln 46-62. And further the key provides user access into the sensitive data and

further can provide be authorizing factor to determine who gets access. The second

mode of access is restricted access where only read operations are allowed see Col 7

Ln 8-16. And this restricted mode is a default mode until storage manager verifies the

device is secure see Par. 7 Ln 17-30.

The text of those sections of Title 35, U.S. Code not included in this action can be found

in a prior Office action.

Claim Rejections - 35 USC § 103

Page 3

Claims 1-2, 4-8, 10-14, 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 698459 to Morgan in view of US Patent 2003/0196100 to Grawrock et al.(hereinafter Grawrock).

Regarding Claim 1, 7, 13, Morgan discloses the at least one storage area in storage circuit, in which storage area protected data relating to circuitry security are located see Col 1 Ln 55-62; mode setting means arranged to set processor in at least two different operating modes, the mode setting means being capable of altering the processor operating mode see Col 7 Ln 8-16; storage circuit access control means arranged to enable said processor to access the storage area in which said protected data are located when first processor operating mode is set see Fig. 2 item 214; storage circuit access control means arranged to prevent said processor from accessing said storage area in which protected data are located when a second processor operating mode is set, thereby enabling said at least one processor to execute non-verified software downloaded into the circuitry see Fig. 2 item 216 & Abstract. But Morgan does not explicitly disclose the authenticating the software and only authenticated software and protected applications having access to protected area of storage. However, Grawrock discloses the authenticating the software and only authenticated software and protected applications having access to protected area of storage see Par. 0015 & Par. 0021-0022. It would be obvious to one having ordinary skill in the art at the time of the invention to include the authenticating of software and only authenticated software

having access to protected area in the invention of Morgan in order to have only trusted applications access secure areas as taught in Grawrock see Par. 0022.

Regarding Claim 4, 10, 16, Morgan discloses the means to indicate which mode the processor is operating see Col 6 Ln 23-35.

Claim 2, 6, 8, 12, 14, 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 6968459 to Morgan in view of US Patent 2003/0196100 to Grawrock et al.(hereinafter Grawrock) and further in view of US Patent 2001/0055980 A1 to Sato.

Regarding Claim 2, 8,14, Morgan does not discloses the timer arranged to control a time period during which processor is in second mode. However, Sato discloses the timer being used to control period of usage see Par. 0014. It would be obvious to one having ordinary skill in the art at the time of the invention to include the timer being used to control period of usage in the invention of Morgan in order to division of usage on CPU and memory as taught in Par. 0015.

Regarding Claim 6, 12, 18, Morgan does not disclose the circuitry being in a mobile telecommunication terminal. However, Sato discloses the circuitry being in a mobile telecommunication terminal see Fig. 2 item 23.

Art Unit: 2432

Claim 5, 11, 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 6968459 to Morgan in view of US Patent 2003/0196100 to Grawrock et al.(hereinafter Grawrock) and further in view of US Patent 2002/0040442 A1 to Ishidera.

Regarding Claim 5, 11, 17, Morgan does not disclose the mode setting means comprise an application program. However, Ishider discloses the mode setting means comprises an application program see Fig. 1 item 40. It would be obvious to one having ordinary skill in the art at the time of the invention to include mode setting means comprises an application program in the invention of Morgan in order to have an user access the mode setting feature as taught in Inshidera see Par. 0063.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
